## ABOUT ME

I am a passionate Full Stack Software Developer having a special interest in Frontend technologies and experience of building Web applications with JavaScript / Reactjs / Nodejs and some other cool libraries and frameworks.

## PROJECTS

### Resume Builder

#### AlmaBetter Verified Project

12/2022 - 01/2023,

Tags: Reactjs, Material Ui, Redux, React-router-Dom, Netlify, Model Deployment, Heroku

- This Resume Builder has four pages i.e. I-Home page, Resume templates, My Resume and About Us and I used react-router-dom to switch from one page to another. The header part contains the navigation from one page to another.
- I used different hooks of react like useState, useForm, useEffect etc to utilize the maximum functionalities of react library. We have also build the preview option so that users can cross check their details.
- We have the delete option, download option and edit option to make our templates dynamic and user friendly.
- Users can also switch from one page to another in any individual template from the back and next button.
- By making this project we have learned a lot of things about front end development. I have learned React, React-redux, material Ui and many more things which helped us a lot in technical aspects as well as to enhance our confidence.

### Book My Show

#### AlmaBetter Verified Project

01/2023 - 01/2023,

Tags: React.js, Bootstrap, MongoDB, Node.js, CSS

- Book-My-Show is an online ticket booking website which gives us the facility to search your movie in the theatre, check the available seats and book the tickets with one click.
- I created a similar website. This project contains mainly three components i.e., select a movie, select a schedule and select seats.
- Frontend are done by React.js, Database are managed by MongoDB, backend is managed by Node.js.

### My Task Management Project

#### TypeScript Project

03/2023 - 04/2023,

Tags: React.js, Material UI, MYSQL, Node.js

- This is a Task and Todo management website which gives us the facility to CRUD operations in website.
- This web App using TypeScript language, Frontend part are created by React.Js, Material Ui.
- Backend is created with the help of Node.js, Express.js and Database managed by MYSQL.

## TECH STACK

### Languages

JavaScript, TypeScript, Java, Html, CSS, SQL, Git

### JS Frameworks

React.js, Next.js, Node.js, Express.js, MongoDB, MySQL, Bootstrap, Tailwind, Material UI

### Platforms

GitHub, Visual Studio

## RELEVANT COURSE WORK

### O level Course

National Institute of Electronics & Information Technology

### CCC Course

National Institute of Electronics & Information Technology

### Cyber Warrior - Ethical Hacking Course

HackingFlix Academy

## EDUCATION

### — Full Stack Web Developer

AlmaBetter - Bengaluru

2022 - 2023

### — B.Sc. in Mathematics

VBSPU, Jaunpur

2019 - 2022

### — XII-Higher Secondary

Smt. Ramrati Devi SR SEC School, Mau

2016 - 2018

### — X - Secondary

Smt. Ramrati Devi SR SEC School, Mau

2014 - 2016

## INTERESTS

Puzzle
